

ASKTUBE AI
ARCHITECTURE
FULL STACK OVERVIEW

SEARCH | TRANSCRIPT | RAG / CHAT

----- = UI boundary → = User / app control flow → = API request → = RAG context injection → = streamed answer

RAG = Retrieval-Augmented Generation · LLM = Large Language Model · WS = WebSocket · CTXT = Transcript Context · UX = User Experience
Core rule: AskTube AI answers from transcript context only, with timestamp citations and recovery states for loading, empty, and error flows.
